## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 14-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The new claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not describe the first and second ends of the shim body "being substantially planar and of substantially the same configuration in plan view, substantially the same size, and normal to the axis". The features of the location of the shim hole as claimed, the other surface is a flat surface, two substantially flat parallel surfaces, and end edges of one end are beveled have not been described. Also, "end edges" and "atraumatic bearing surfaces" are new terminology introduced.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3732

4. Claims 14-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim. The claims were considered as if the new matter limitations were not present. Kim discloses a ligament shim comprising a body having a first end and a second end, an axis extending from the first end to the second end, at least two surfaces extending from the first end to the second end and substantially parallel to the axis, at least one of the two surfaces being arc-shaped and a shim hole (figures 1,3). The arc-shaped surface extends outwardly from the axis. The two surfaces are arc-shaped surfaces and are opposed surfaces and extend inwardly toward each other. The surfaces comprise four surfaces including two arc-shaped surfaces and two outwardly rounded surfaces.

#### *Response to Arguments*

5. Applicant's arguments filed February 17, 2004 have been fully considered but they are not persuasive. The new claims contain features that are new matter.

#### *Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3732

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
